CHARTS

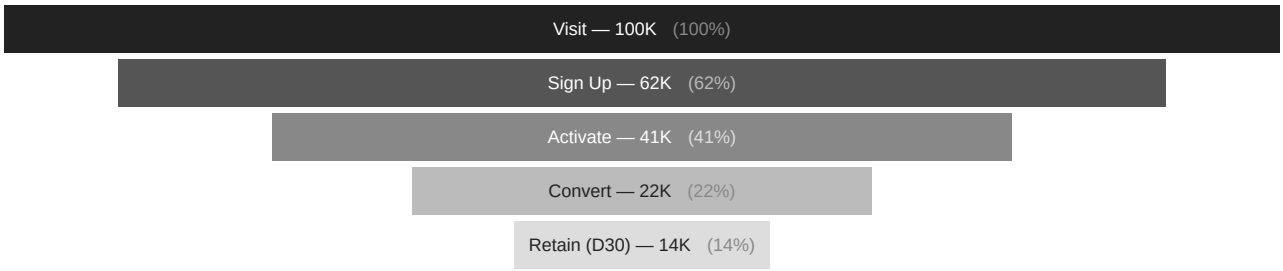
Feature Usage Distribution

CHARTS

Conversion Funnel



Largest drop: Sign Up → Activate (34% loss). Root cause: KYC friction for non-US-document holders.

CHARTS

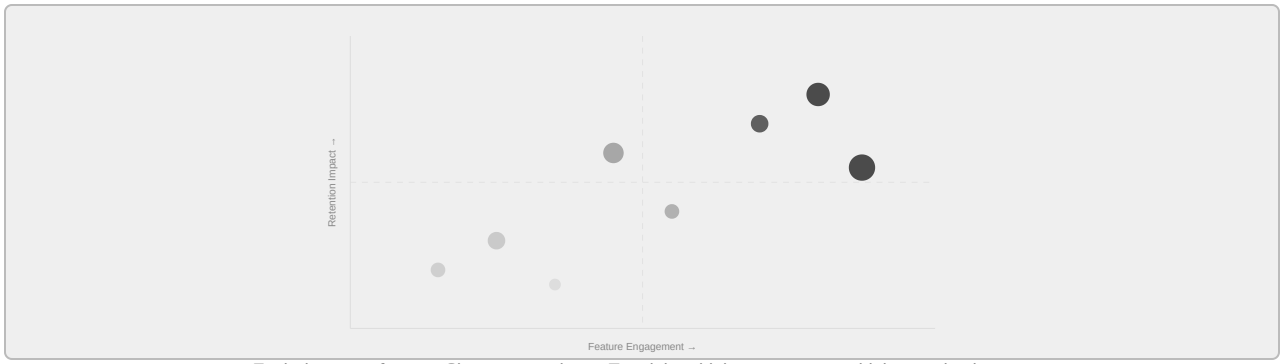
Cohort Retention Heatmap

Cohort	M0	M1	M2	M3	M4	M5	M6
Jan	100%	68%	52%	44%	38%	34%	31%
Feb	100%	72%	56%	48%	42%	38%	
Mar	100%	75%	60%	52%	46%		
Apr	100%	78%	64%	55%			
May	100%	80%	66%				

Improving trend: M1 retention up from 68% (Jan) to 80% (May). New onboarding flow deployed in March.

CHARTS

Feature Engagement vs. Retention Impact



Each dot = one feature. Size = user volume. Top-right = high engagement + high retention impact.

CHARTS

Market Opportunity Map

Bubble size = addressable market. Y-axis = growth rate. X-axis = current market size.

ANALYSIS

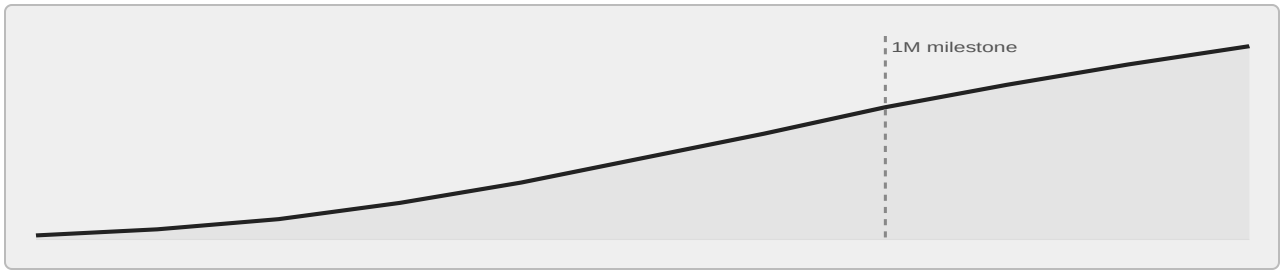
Year-over-Year Comparison

ANALYSIS

Cumulative User Growth



Jan 2024 Jul 2024 Jan 2025 Jul 2025 Jan 2026

ANALYSIS

Pareto — Top Issues (80/20)

Top 3 issues account for 82% of all error volume. KYC failure alone drives 40% of support contacts.

ANALYSIS

Conversion Rate by Platform

IOS	ANDROID	WEB
5.8%	4.2%	3.1%
Conv Rate	Conv Rate	Conv Rate

iOS outperforms Android by +38% and Web by +87%. Recommend investing in Android onboarding optimization.

QUALITY

Data Quality Scorecard

Data Source	Completeness	Freshness	Accuracy	Overall
User Events	98%	Real-time	99.2%	**A**
Transactions	99%	<1 min	99.9%	**A+**
Support Tickets	82%	4-hr lag	91%	**B**
Marketing Attribution	68%	24-hr lag	72%	**C**

Marketing attribution data quality is below threshold. Recommend implementing server-side tracking and UTM governance.

EXPERIMENTS

CONTROL (A)

3.2%

Conversion Rate

n = 42,186

VARIANT (B)

5.1%

Conversion Rate

n = 41,994

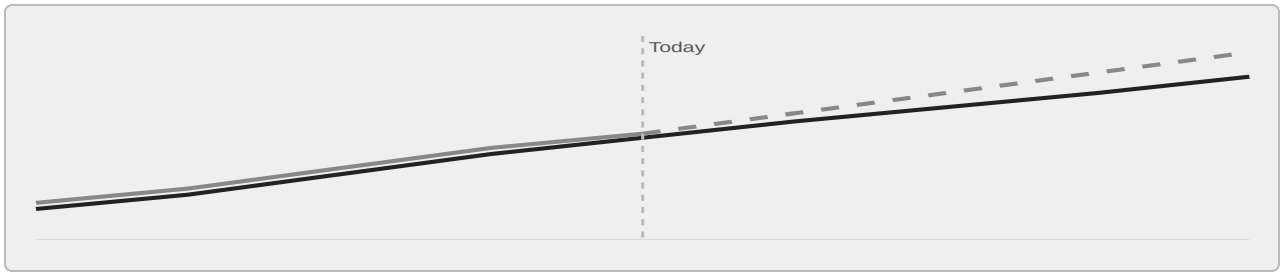
+59% lift

STATISTICAL SIGNIFICANCE	CONFIDENCE	PROJECTED IMPACT
p < 0.01	**99.4%**	**+$1.2M ARR**

Recommendation: Ship Variant B to 100%. Monitor for 14 days before removing feature flag.

ANALYSIS

Forecast vs. Actual



Plan — Actual — Projected

Tracking 4% ahead of plan through Q2. Forecast assumes current growth trajectory holds with no seasonal adjustment.

SUMMARY

Executive Data Summary

$18.4M	2.4M	4.2%	68
ARR (+24%)	MAU (+18%)	Churn (-0.8pp)	NPS (+6)

KEY INSIGHT

Onboarding redesign drove +82% activation lift. Expanding to remaining segments in Q2.

RISK

Marketing attribution data quality at C-grade. Decisions on paid spend allocation are unreliable.

RECOMMENDATION

Ship A/B test winner (+59% conversion). Invest in server-side tracking. Prioritize Android optimization.
